About Us : Eirin Distillery

Eirin Distillery is producing Japanese Shochu and spirits in Kurume city, Fukuoka, Japan where its surrounded by rich nature.

We use this environment as a natural resource and produce the best quality Japanese alcohol.

Our Shochu, Japanese spirits are loved by locals, but we also want to share this great quality with more people, so we decide to develop a new type of Gin, "Japanese Sake Gin".

Tasting Note

Sake Gin Original

A gin based on classic dry gin, blended with spices that match well with cured ham and meat dishes. You can taste the citrus and spices differently depending on how you drink it, such as straight or with tonic water.

Please find your own style of drinking.

Sake Gin Wasabi

Our familiar food, Wasabi is used for this Gin. You will love the spiciness of Wasabi and well-balanced sake mouthfeel.

Sake Gin Yuzu

We only chose simple but high quality botanicals to maximise the flavour of the yuzu and juniper berries.

What makes this Yuzu Gin special is that it brings out the sweetness and itself of the Japanese yuzu and the woody texture of the juniper berry.
